

ELIOS | Solar Rail

Aluminum Solar Rail 4.4M 173"

Data Sheet

The Elios Aluminum Solar Rail 4.4M (173") is designed to meet the needs of both residential and commercial solar installations. This 4.4-meter aluminum rail offers a perfect balance of strength, flexibility, and ease of use. Engineered from high-grade aluminum alloy, it provides a secure and stable foundation for solar panel mounting—making it an ideal choice for professionals looking for dependable, long-lasting performance.

Features & Benefits

Made from corrosion-resistant aluminum to ensure reliable performance in even the harshest weather conditions.

Designed for quick, hassle-free installation.

Built with high-strength aluminum alloy for enhanced structural integrity.

Engineered for long-term durability.
