

ELIOS | Foundation Bolt Pack for TerraG10

Solar Ground Mounting System

Data Sheet

The Elios Foundation Bolt Pack provides a secure, long-life anchoring solution for the Terra G10 Adjustable Ground Mount System on concrete foundations. Intended for ground-mounted solar PV installations, the kit includes four L-shaped M16×400 mm anchor bolts with matching nuts and washers, plus a heavy-duty steel base plate to ensure high structural strength and stability. When installed in concrete, it keeps the Terra G10 system firmly fixed for reliable operation in harsh weather and challenging terrain.

SPECIFICATIONS

Used to install Elios Terra G10

Steel base and bolt

M16x400mm

1 unit/carton (need 3 units per rack)

N.W/G.W: 4.2kg/4.8kg (9.26 lbs / 10.58 lbs)

Packaging size: 300x270x430mm (11.81x10.63x16.93in)

Applications

- Off-Grid
- Residential
- Commercial
- Industrial
- Agriculture
- Solar Power Plants
